

The Pool

The fundamental investment objective of NWM Canadian Tactical High Income is to invest in publicly traded securities that distribute income with a target yield of 4% in excess of the S&P/TSX Composite Index Yield.

The Strategy

The fund has the ability to use covered call and put strategies, primarily investing in securities that may include: equities, preferred shares, common shares, REITs, high yield bonds, convertible debentures, options, exchange-traded securities, mutual funds, Canadian bonds and foreign bonds. The fund may also invest in cash and money market securities.

The Manager

Nicola Wealth Management Ltd. (NWM), the "Fund Manager," is a wealth management and planning firm established in 1994. With a philosophy built on cash flow and diversification, our growing series of funds is managed by members of NWM's Portfolio Management Team.

Covered Call Option Current Liabilities

This is the current market value of the Covered Call Options written against our underlying long-only stock positions. Writing a Covered Call Option is a strategy that delivers a premium by agreeing to sell a stock we already own at a certain price. Writing (selling) Covered Call Options becomes an obligation to the writer (seller).

Put Option Current Liabilities

This is the current market value of the Put Options that were written in the portfolio. Writing a Put Option is a strategy that delivers a premium by agreeing to buy a stock at a certain price. Writing (selling) Put Options becomes an obligation to the writer (seller).

Collateral sources and notional put option exposure

Disclosure:

- Past performance is not indicative of future results.
- Returns are net of fund expenses.
- Please refer to the NWM Funds Offering Memorandum for additional details and important disclosure information.

NWM is registered as a Portfolio Manager, Exempt Market Dealer and Investment Fund Manager with the required provincial securities' commissions.

Notional Put Option Exposure

The aggregate notional amount of Put Options is the hypothetical total if all Put Options were exercised simultaneously. It is calculated as the cumulative number of contracts multiplied by 100, and then multiplied again by the prices at which you are obligated to buy or sell the underlying shares.

Collateral Sources

These are assets available to be drawn upon should notional put options be exercised.
