

NICOLA WEALTH

The Pool

Nicola U.S. Equity Income Fund seeks to provide unit-holders with long-term capital growth and income by investing in a diversified portfolio of U.S. equity securities. Companies with attractive income characteristics (through stable and growing earnings and dividends) improving capital efficiencies are considered for inclusion in the fund. This fund is offered in U.S. Dollars. Returns and dollar amounts are quoted in USD. A Canadian Dollar series of this fund is also available.

The Strategy

The pool is managed using an active investment strategy. In addition to owning stocks, the pool utilizes a covered-call strategy to reduce volatility and enhance income. Investment selection will be based on a top-down and bottom-up investment process that focuses on stocks that have a compelling combination of quality, valuation, and growth.

The Manager

Nicola Wealth, the "Fund Manager," is a wealth management and planning firm established in 1994. With a philosophy built on cash flow and diversification, our growing series of funds is managed by members of Nicola Wealth's Portfolio Management Team.

Covered Calls

In addition to concentrating on high-dividend paying equities, the Fund will also sell covered calls on either a portion or all of selected equity positions. The amount of the entire equity position that will have call options written against it will depend on the volatility (and thus option premiums) of the underlying common equity and the projected upside on the Manager's target price. Equities that are expected to be long-term core holdings, but are near their current target prices, are ideal candidates to have covered calls written against them.
